

Sharing Experience of Communities Hosting Nuclear Facilities

Side Event during the 68th IAEA General Conference
18 September 2024, 15:00 – 16:30, Board Room D, C building, 4th floor

Transparency and open dialogue with stakeholders are vital to the long-term sustainability of nuclear power programmes.

As hosts or potential hosts of nuclear facilities, local stakeholders have a unique role in nuclear power programmes. Although local contexts vary, host communities share a spectrum of concerns, needs and values. Addressing those concerns and needs is cornerstone for collaborative and trusting relationship throughout the life cycle of nuclear facilities.

This side event will explore what it means to be a local stakeholder and how communities can work together with other stakeholders, including governments and nuclear industry, to enable the success of nuclear projects.

Scientific Secretaries: Irena Chatzis, IAEA Department of Nuclear Energy
Stefan Mayer, IAEA Department of Nuclear Energy

Sharing Experience of Communities Hosting Nuclear Facilities
